

# FERRING ROADS SCHEME ASSOCIATION

**Working hard on your behalf...**

## **Major Achievements and Clear Membership Benefits**

For months, our dedicated team has been hard at work ensuring that the FRSA road network remains safe, reliable, and fit for purpose. We have successfully completed major works involving the replacement of collapsed pipe work throughout our network. This critical intervention has resolved longstanding water drainage issues and significantly reduced risks of future collapses.

In the coming months, we will be focusing on carrying out patch repairs, fixing potholes, and addressing other surface inconsistencies.

Recently, we have received several enquiries regarding various matters that do not fall within the FRSA's remit. Here is what membership fees support:

- **Road Surfaces:** The maintenance of road surfaces, including whole road resurfacing projects, localised repairs and our commitment to an annual sweeping schedule (where needed).
- **Road Markings:** We ensure that white and yellow lines are maintained properly.
- **Gullies:** We conduct regular tests on existing soakaways to prevent flooding.
- **Gardens:** Your membership fee also contributes to the upkeep of our five community garden sites, enhancing the local environment.
- **Public Liability Insurance:** To cover members against claims (up to a limit of £5 million) brought against them in connection with the unadopted road for which they are responsible.

By clearly defining these areas of focus, we hope to address any confusion regarding your membership fee and to reaffirm our dedication to maintaining the infrastructure within the village.
